

Sensory Seat Cushions

These Sensory Seat Cushions are inflatable dynamic balloons.

They can be used on the floor to strengthen lower body muscles and to train for balance as well. Alternatively get students to sit on this on their own seat to help with children that find it hard to sit still.

One side of the cushion is bump-studded while the other side is more gently textured to provide users with different sensations to enhance the sense of touch and coordination.

Measures 35cm diameter. Maximum load 100 kg. All ages.
